

Putnam County Census Reports, 1910 and Marriage Records, 1901-1910

Compiled by

Nancy Cooley Alvers and Janice Smith Mahaffey

to honor

Putnam County, Florida's Sesquicentennial
January 13, 1849 - January 13, 1999

Life in Rural Putnam County

In 1910, Putnam County's population was 13,096. The new courthouse was dedicated December 2, 1909, and the county commissioners, shown above (W.C. Alvers third from the left), had accepted a proposal by the Converse Bridge Company of Chattanooga, Tennessee, to build a bridge across the St. Johns River for \$43,000. The bridge crossed the river from the foot of Laurel Street to Hart Point. The first piling for the traffic bridge was driven on September 17, 1909, and the bridge celebration was held on February 22, 1910, with a band concert, an auto parade across the bridge and river excursions. Following the opening of the wooden bridge were speakers including ex-Governor Napoleon B. Broward. Barbecues covered 1,200 feet of tables. "Seven large beeves, six sheep and six great hogs were barbecued, coffee was made in great kettles and barrels of it were served, while the bread was in a quantity to 'Take the whole bakery.'"

Our Place in Time, A Chronology of Putnam County

PAIvers Publishing
P.O. Box 368, San Mateo, Florida 32187

Putnam County, Florida, was created from parts of Alachua, Orange, Marion, Duval and St. Johns Counties on January 13, 1849, and named for Benjamin Alexander Putnam, speaker of the Florida House of Representatives in 1848. This series of books containing the census reports for this county was undertaken at the conclusion of the Florida Sesquicentennial in 1995 as a project to help Putnam County celebrate its sesquicentennial in 1999.

This project was a cooperative endeavor between myself and Janice Mahaffey, archivist for Putnam County. Our efforts for over five years was to transcribe all of the census reports since the formation of the county through 1920, the last census available during this period.

This has been a time-consuming project. I have spent hours each day transcribing census and marriage reports, and many more hours were spent with Janice Mahaffey at the Putnam County Archives proofreading the manuscript. Book 1 contains all the census reports in the nineteenth century – 1850, 1860, 1870, 1880, and 1885. Book 2 lists the 1900 census report; Book 3, 1910 and Book 4, 1920. In each book, following the census reports, we have included a chapter containing the marriages which occurred during that period.

*To err is human
To forgive divine.*

We know there will be errors. We have diligently endeavored to make each page as accurate and as nearly like the original page as possible. One change we made was to emphasize the family name in bold capital letters. To condense the large census pages to book size, we used these 2-letter state abbreviations:

AL - Alabama	DE - Dist.Columbia	KS - Kansas	MS - Mississippi	NY - New York	RI - Rhode Island	VA - Virginia
AK - Alaska	FL - Florida	KY - Kentucky	MO - Missouri	NC - North Carolina	SC - South Carolina	WA - Washington
AR - Arkansas	GA - Georgia	LA - Louisiana	MT - Montana	ND - North Dakota	SD - South Dakota	WV - West Virginia
AZ - Arizona	HI - Hawaii	ME - Maine	NE - Nebraska	OH - Ohio	TN - Tennessee	WI - Wisconsin
CA - California	ID - Idaho	MD - Maryland	NV - Nevada	OK - Oklahoma	TX - Texas	WY - Wyoming
CO - Colorado	IL - Illinois	MA - Massachusetts	NH - New Hampshire	OR - Oregon	UT - Utah	
CT - Connecticut	IN - Indiana	MI - Michigan	NJ - New Jersey	PA - Pennsylvania	VT - Vermont	
DE - Delaware	IA - Iowa	MN - Minnesota	NM - New Mexico	PR - Puerto Rico	VI - Virgin Is., U.S.	

We encourage the reader to use the index to find persons of importance to the reader and photocopy those pages. Then we recommend that the reader go to the library and use the page number on the page from our book to locate and print the original page on the appropriate reel of microfilm that contains the Putnam County census reports. The reader may have personal knowledge which may correct any incorrect assumptions we had to make.

Census reports were completed by enumerators who went from door to door gathering information from some person in the household. At times these persons gave erroneous information. If a family was not at home, the enumerator may not have been able to contact them and they may not be listed on the census.

There was a cutoff date at which a person could or could not be listed on the census. If the enumerator visited a home in which a baby had been born after the cutoff date, the baby would not be listed on the census. Similarly, if the enumerator visited a home in which a person had died after the cutoff date, that person would be listed.

The enumerators often had problems with penmanship and spelling. Phonetic spellings (Magloflin) and alternate forms of spelling (RIALS, RILES, ROYALS, RYALS, RYELS, RYLES) were often encountered. Readers who can not find a family name should try to think of other ways in which the name may have been creatively spelled.

In most cases, we have listed each name as the enumerator spelled it, whenever possible, but there have been many times when we made educated guesses. In the index, we endeavored to spell names correctly whenever possible. We want to thank Margery Neal Nelson for her help with identification of people living within the Fruitland Peninsula.

Census records can be a great source of information; however, the reader must weigh the information, remembering the inaccuracies that may have occurred due to the enumerator's handwriting and spelling, illegible documents, or to our efforts to transcribe handwriting records. (Is it RUICK or RINCK?)

We hope this series of census transcriptions will aid persons who are interested in their ancestors more easily find those persons who lived here in Putnam County between 1850 and 1920. Use the index to find the family name, photocopy the page with family information, and use it to find the original page on microfilm containing the Putnam County census and check our interpretation of that page with your knowledge of your family.

Individual's information gathered in the 1910 census included four items on the location: Street name and number; Column 1, Dwelling and Column 2, Family numbers in order of visitation.

Next was Column 3, Name of each person whose place of abode on April 15, 1910, was in this family. Instructions were to include every person living on April 15, 1910, and omit children born after that date. The third category was the Column 4, Relationship of each person listed to the Head of the family.

The fourth category asked for Personal Descriptions, including Column 5, Sex, Column 6, Race, Column 7, Age at last birthday, Column 8, Whether single, married, widowed, or divorced; Column 9, Number of years of present marriage, and Mother of children, Column 10, born and Column 11, still living.

The Nativity category listed in Column 12, the Place of Birth for the Person, in Column 13, the Birth place of the person's Father and in Column 14, the Birth place of the Person's Mother. The next category listed Citizenship in Column 15, Year of Immigration, and Column 16, Whether naturalized or alien. The next category provided information on Language, whether the person spoke English, or if not, which language was spoken.

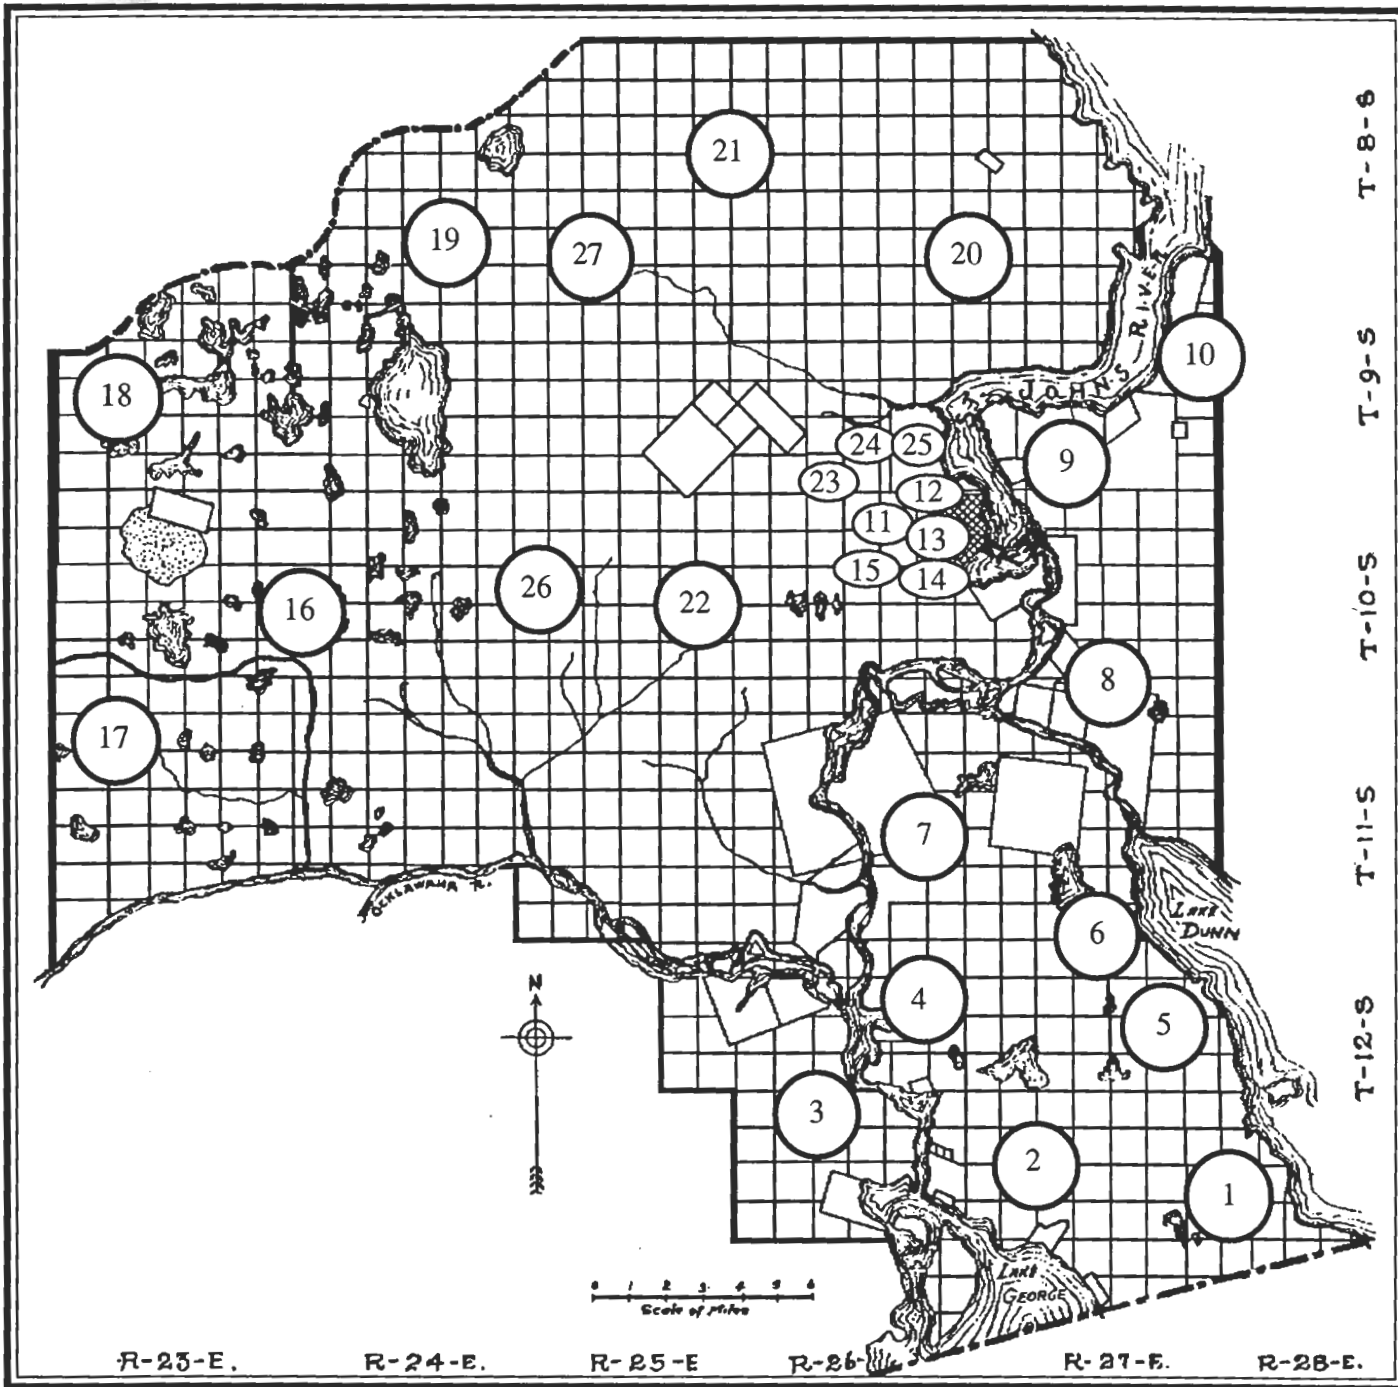

Occupation provided information in Column 18 on Trade or profession or particular kind of work done by this person; in Column 19, General nature of industry, business or establishment in which this person works; Column 20, whether an employer, employee or working on own account; Column 21 provided employee information, whether out of work on April 15, 1910, and Column 22 listed the Number of weeks out of work during the year 1909.

Education included Column 23, Whether able to read; Column 24, Whether able to write, and Column 25, Attended school any time since September 1, 1909.

Ownership of home provided information in Column 26, Owned or rented; Column 27, Owned free or mortgaged; Column 28, Farm or home, and Column 29, Farm schedule number.

Column 30 asked if the individual had served in either the Union or Confederate Army or Navy. Column 31 asked Whether blind (both eyes), and the last column asked if the individual was deaf or dumb. More often than not the last five columns were filled with numbers that seem to describe a code for the occupation of the individual (for example, farmers usually had a farm schedule number followed by -0 -0 -0-0). I condensed the space of these codes into the last column.
